## EXPLANATORY NOTES

This Part contains particulars of the population in each Municipality and District Council and in each Non-municipal Town of 1,000 persons or more in South Australia according to various characteristics of the population.

The grouping into Statistical Divisions is identical with that used in State statistical publications.

A map showing the location and composition of each Statistical Division and a detailed map of the Metropolitan Area of Adelaide, together with an index to facilitate reference to any local government area or town for which particulars are shown, are inserted at the end of this Part.

Under the system of local government in South Australia there were, at Census date, 42 Municipalities and 100 District Councils.

Municipalities are usually urban in nature, but some are, for Census purposes, classified as rural or partly rural. In these cases, any municipality or part of a municipality which is regarded as rural has been clearly indicated in each table.

District Councils, on the other hand, are usually rural in nature, but within District Councils, Non-municipal Towns of 1,000 persons or more are, for Census purposes, regarded as urban and shown separately. They are indicated in each table by the letters "N.M."

Only about 15 per cent. of the area of South Australia was covered by the local government system, the remaining 85 per cent. being unincorporated for local government purposes.

Statistics shown in this Part relate to local government areas and unincorporated areas as constituted at 30th June, 1961, and do not take account of boundary changes since that date.

Particulars of full-blood aboriginals are excluded throughout.

Because of the limitation of space and the need for uniform presentation of data it has not been possible to publish more detailed information for local government areas in each table of this Part.

(a) "Not at Work" includes those who stated that they were usually engaged in work, but were not actively seeking a job at the time of the Census by reason of sickness, accident, etc., or because they were on strike, changing jobs or temporarily laid off, etc. It includes also persons able and willing to work but unable to secure employment, as well as casual and seasonal workers not actually in a job at the time of the Census. The numbers shown as "Not at Work", therefore, do not represent the number of unemployed available for work and unable to obtain it.

(a) "Not at Work" includes those who stated that they were usually engaged in work, but were not actively seeking a job at the time of the Census by reason of sickness, accident, etc., or because they were on strike, changing jobs or temporarily laid off, etc. It includes also persons able and willing to work but unable to secure employment, as well as casual and seasonal workers not actually in a job at the time of the Census. The numbers shown as "Not at Work", therefore, do not represent the number of unemployed available for work and unable to obtain it.

(a) "Not at Work" includes those who stated that they were usually engaged in work, but were not actively seeking a job at the time of the Census by reason of sickness, accident, etc. or because they were on strike, changing jobs or temporarily laid off, etc. It includes also persons able and willing to work but unable to secure employment, as well as casual and seasonal workers not actually in a job at the time of the Census. The numbers shown as "Not at Work", therefore, do not represent the number of unemployed available for work and unable to obtain it.
